## Aerospace/Rocketry

Superintendent: Shawn Gideon

**Judging: Sunday, July 27, 2:00 p.m.**

**Rocket Launch Sunday, July 27;  
7:00 p.m. WHS Football Field**

- Exhibitor may exhibit up to 2 4-H entries, but only 1 entry per class and 2 entries in Open Class.
- Refer to Rules & Regs on pages 4-6.
- If a rocket qualifies for the [Kansas State Fair](#), exhibitors should read the State Fair rules for the Aerospace/Rocketry division as they may be different from those at the county fair. Be sure to check class numbers, they may be different.
- If two rockets are entered, one rocket must be a "model rocket kit" and the second may be entered into any other applicable class. An exhibitor may not enter two rockets in the same class.
- 4-Hers are to complete and sign the rocketry information form, available from <http://rocketry.engtech4ks.com/> and attach it to a 10" x 13" envelope. The envelope should contain: instructions on how to construct the rocket, up to 5 pages of pictures, pictures are to be attached to sheets of paper, from both construction and launch, documentation of any flight damage that occurred, modifications made to the rocket, except for paint scheme and decals, additional page for altitude calculations if the space on the form is not enough. Additionally, original design rockets need to include: up to 5 additional pages of photos and documentation of how the rocket was tested for stability.
- If a safety violation is noted by the judges, superintendent, or other staff, the exhibitor's rocket, at the judges discretion, will receive a participation ribbon.
- Rockets are displayed upright on a display stand with a sturdy rod that does not extend past the top of the rocket or stand, unassisted, unless the rocket is taller than 4 feet in which case no display stand is required and the rocket may be displayed on its side, rockets are not to be displayed on launch pads to save space and prevent someone from being poked in the eye.
- Rockets ARE NOT to be displayed with used or unused rocket engines either in the rocket or a part of the stand, if rocket engines are included in the exhibit the judge may disqualify the exhibit.
- Rockets should be flown, unless there is an active burn ban in the county or conditions are too dangerous to safely launch the rocket. Just flying the last stage (the part with the nose cone) of a multi-stage rocket is acceptable.
- Angles of fins must fall within a plus or minus 2 degree variation using an approved fin alignment guide (KSSTAC10). An official fin guide is available from <http://rocketry.engtech4ks.com/>
- Fins and body tubes, except those in the introductory division are to be filled and sealed with putty, sanding sealer and/or primer or other suitable filler to eliminate the appearance of body grooves and wood grain.
- Fins and launch lugs are to be filleted to reduce drag and properly secure them to the model.
- Engine mounts are to be securely attached to the body tube and any seams or plastic parts are to be sanded smooth.
- The recovery system (typically a parachute or streamer) should be attached according to the instructions and the nose cone is to fit snugly, but still allow for easy removal.
- Exhibits must be uniformly painted and smoothly finished, without "runs", "orange peel", or "alligator skin" or finished as per rocket instructions, and decals, if used, are applied smoothly.
- Scale Models are to be finished and completed with a majority of decals (greater than 70%).
- Original design rockets, must be designed by exhibitor who is 11 years or older, cannot be a modification of a pre-existing kit and must be of original design.
- Original design rockets must include detailed instructions, so that someone could construct the original designed rocket just like a kit purchased at a store. Instructions can be as many pages as needed to convey full and complete construction techniques.
- Rockets that use more than one 'D' engine or equivalent are considered mid or high power rockets and may only be exhibited by youth 14 and up who hold a membership in either NAR or Tripoli organizations. A high power information form is to be completed and placed inside of the information packet.
- Models may not be judged based on their paint scheme, with the exception of rockets that fit the definition of a scale model. They may be judged based on the paint scheme.
- For all Engineering & Technology Educational Exhibits, see rules on page 17-18.

## Ag Mechanics Welding

Superintendent: Ken Smith

**Judging: Sunday, July 27, 1:00 p.m.**

1. Exhibitor may exhibit up to 3 entries, but only 1 entry per class.
2. Refer to Rules & Regs on pages 4-6.
3. Wheeled exhibits must utilize a braking mechanism which prevents the exhibit from freely rolling while on display.
4. Exhibitors are responsible for providing sufficient braking or "chocks" for trailer exhibits to ensure that the exhibits do not move once positioned. If using a wheel "chocking" mechanism, the two individual blocks should be connected together as a pair of chocks, so they do not become separated. At least 1 pair of chocks should be placed on each side of the trailer to prevent movement.
5. For trailer exhibits, the tongue of the trailer should have a locking mechanism (e.g. padlock) to prevent the trailer from being moved by unauthorized individuals while being displayed.
6. Exhibits with downward swinging parts, such as tailgates, that could pose a fall/striking/crushing hazard should have a tamper resistant locking mechanism such as a "zip tie" or a "cotter-key" through a release pin that would prevent the swinging part from being accidentally released and falling on someone.
7. Each exhibit must be free-standing or sufficiently supported by an exhibitor supplied support system that is moveable & is part of the total dimensions and weight of the exhibit as described previously. Exhibit display boards should have a portable, movable base and examples should be firmly affixed to the board to ensure all parts of the display stay together. No exhibits may be staked to the ground for display.
8. Top heavy items should be braced or placed in a stand sufficient to prevent

it from toppling over while on display.

9. Repair projects having adequate original finish need not to be repainted.
10. Cutting surfaces, such as blades or knives, are to have a protective covering over them to prevent injury. The covering should be easily removed and reinstalled for judging. Foam "pool noodles" and multiple layers of cardboard are acceptable.
11. Display cases for small exhibits, such as knives, are acceptable, and must be easily opened so the item can be removed and examined as part of judging.
12. Exhibits that include weaponry of any kind will be disqualified. Weaponry is defined as any instrument, possession, or creation, physical and/or electrical, that is intended to be used to inflict damage and/or harm to individuals, animal life, and/or property.

14. Electric powered (battery, corded, solar, or alternative energy) should have a shutoff or disconnect switch.
15. If a safety violation is noted by the judges, superintendent or other staff, the exhibit, at the judge's discretion, will receive a participation ribbon.
16. The exhibitor's name and county must be tagged or labeled in a prominent location on the display.
17. Each exhibit, except for display boards, must include an Ag Mechanics information packet (see details below). Entry of just a packet without an accompanying exhibit is not a sufficient exhibit.
18. Each exhibitor is required to complete the "4-H Ag Mechanics Exhibit Information Form, for each exhibit, except for display boards, which is available at: <http://welding.engtech4ks.com/>
19. This form must be attached to the outside of a 10" x 13" envelope. Do not tie the envelope to the exhibit. All revisions of all forms previously released dated prior to current year are void for use and new forms must be obtained & used that are dated by the State 4-H Office for the current year.
20. Each exhibit information packet should include the following items:
  - a. Bill of materials for the project with associated costs. Scrap items used may be listed as having a \$0.00 cost.

## **Building Block Engineering (BBE)**

Superintendent: Jesse Gehrt  
Assist. Superintendent: Jennifer Eastman

**Judging: Sunday, July 27, 11:00 a.m.**

1. Exhibitor may exhibit up to 2 4-H entries, but only 1 entry per class and 1 entry in Open Class.

2. Refer to Rules & Regs on pages 4-6.
3. Up to 4 exhibits will be selected to advance to the [Kansas State Fair](#).
4. Total exhibit dimensions may not exceed 2 feet high, by 2 feet wide, by 2 feet deep.
5. The minimum exhibit dimensions must be at least 6 inches wide and deep.
6. All exhibits are required to be placed in a sturdy see through enclosure with a top, bottom, and 4 sides. A clear tub turned upside down with the exhibit placed on the lid would be an acceptable enclosure. It may be desirable to place a cutting board or other hard surface between the lid and base plate of the exhibit to make it sturdy. This is to keep exhibit parts from being scattered throughout the fair.
7. All components used in construction should be dust free, clean, free of chips, scuffs, or cracks.
8. Gaps or cracks should not be visible between assembled blocks unless they fit with the story, for example an earthquake.
9. The primary building component can be integrated into dioramas to illustrate architectural aspects that may be difficult to convey with traditional interlocking blocks.
10. The use of existing "store bought" sets for major architectural elements of the display is not allowed for any eligible exhibits for Kansas State Fair. **For County Fair, kits may be used for Class 4114 Only.** Use of figurines from sets is allowed as are using individual bricks to create something different than the architectural component of the set it came from.
11. Dioramas should be suitably complex and have multiple elements, for example a camp site that has a log cabin, a tree fort, and a car.
12. All Dioramas should have a story, which is part of the information pack that describes what is happening in the diorama; this can be as simple (the nursery rhyme "Jack and Jill" for example) or as complex as needed to explain to someone looking at the exhibit what is happening.
13. Vehicles that are intended to stay in a single place should be affixed to base plates with sticky tack, hot glue, or other method.
14. Mechanical enhancements or motion elements that add motion to the diorama are acceptable and encouraged. If used, judges should be able to use them and instructions should be provided for operation.

15. Artistic designs, for example recreating paintings like the "Mona Lisa" or "Starry Nights" and sculptures like "David," are not permitted as exhibits and one ribbon placing should be deducted.
16. The exhibitor's name and county must be tagged or labeled in a prominent location on the display.
17. **County Only exhibits in the Building Creations Class do not need a packet.**
18. All diorama exhibits must include a Building Block Engineering information packet (see details below). Entry of an exhibit without a packet is not a sufficient exhibit, unless entering County Only Building Creations Class.
19. Each exhibitor in the diorama classes is required to complete the "4-H Building Block Engineering Exhibit Information Form, which is available at: <https://www.engtech4ks.com/building-block-engineering-bbe/>.
20. This form must be attached to the outside of a 10" x 13" manila envelope. Do not tie the envelope to the exhibit. Does not include Building Creations.
21. Each exhibit information packet should include the following items:
  - a. 1 to 5 pages of photos showing work on the exhibit, preferably from a beginning state to final or completed state. Final pictures help in determining where a part might go in the case of something coming loose.
  - b. If appropriate, operating instructions for mechanical portion of the diorama.

Each exhibit will be judged on uniqueness, creativity, neatness, accuracy of material, knowledge gained, and content. An exhibit judging score sheet is available at: <http://engtech4ks.com/>. For example, a rocket that may have crashed and/or is highly damaged may be made into an educational display or poster that tells a great story with many lessons learned.

5. Follow copyright laws, citing all sources of information in a standard notation. Sources of information must be cited on the front of your exhibit, including all posters and educational display boards.

Other components are to adhere to appropriate dimensions as stated elsewhere.
9. Educational Project notebooks must be organized in a 3-ring binder.
10. Any three dimensional display exhibits may not be thicker than 2".
11. Exhibitor's name, county, age, and year(s) in project must be tagged or labeled in a prominent location on the notebook, and/or "Construction Kit." ## Veterinary Science

Superintendent: Steve Tharman

**Judging: Saturday, July 26, 9:30 a.m.**

1. Exhibitor may exhibit 1 entry in 4-H.
2. Refer to Rules & Regs on pages 4-6.
3. A Veterinary Science exhibit may consist of a poster, notebook or project display. The exhibit may represent material from any of the Veterinary Science projects including entry level exhibits from Unit I.
4. If photographs are to be part of the exhibit, remember that they will be viewed by the public. Make sure that the photographs are in good taste and will not be offensive to anyone. Graphic photographs of excessive bleeding, trauma or painful procedures are not appropriate. For exhibits related to veterinary surgical procedures, aseptic techniques need to be shown, for example, use of drapes, use of sterile procedures, wearing of gloves and other appropriate veterinary medical practices.
5. First-Aid Kits: Because of public safety concerns and risk of theft of first-aid kit contents (veterinary drugs/equipment) with perceived potential for drug abuse, animal first aid kits containing any drugs or medications will be immediately disqualified and not displayed.

6. First Aid kits wishing to include medication information should instead utilize written descriptions, photographs, drawings, computer generated print-outs or empty packaging of pharmaceuticals.
7. Veterinary Science Posters - This exhibit presents the viewer with a design that is simple and direct, unlike a display that usually presents more information. A poster should not exceed 22" x 30" and may be either vertical or horizontal.
8. Veterinary Science Displays - A display may include but is not limited to: a 3-dimensional exhibit, a scale model, the actual product (for example: skeleton; teeth; samples of leather, fur, or dried skin damaged by disease or parasites) or a notebook. A display is not a poster. A display may be mounted on poster board not to exceed 22" x 28" or on 1/4" plywood or equivalent that does not exceed 24" high or 32" wide or in a three ring binder or another bound notebook format.
9. Veterinary Science Notebooks: Individual entries are to be placed for display in a three-ring notebook for competition. Notebooks may not be larger than 8 1/2" x 11".
10. Name, county/district, age and year in project should be on the front of the poster, display or notebook.
11. Appropriate topics include: maintaining health, specific disease information, photographic display of normal and abnormal characteristics, animal health or safety, public health or safety, proper animal management to ensure food safety and quality, efficient and safe livestock working facilities, a topic of the exhibitor's choosing related to veterinary medicine or veterinary science
12. Due to these being science displays, all references and information must be properly cited. Proper sources include, but are not limited to: professional journals & publications, professional AVMA accredited websites, interviews with veterinarians and excerpts from Veterinary Educational Literature. Plagiarism will result in a disqualification. Please study your topic and present the information to your audience in your own words.

3. Articles exhibited must be an original design created by the exhibitor.
4. **All two-dimensional art, including fine art, intended to be hung, will need to have a wire hanger or rope (especially for large projects). Saw tooth hangers will only be allowed at the County Fair. No string or tape will be allowed. Exhibits will not be State Fair eligible if correct hardware is not used.**
5. To be eligible for State Fair, exhibits must be of manageable size and be easily transported and displayed by one person.
6. Large art items will not be eligible for Kansas State Fair.
7. Fractal Burning will not be allowed on any art pieces.
8. Multi-piece items should be marked accordingly.
9. No plant or plant materials needing watering can be entered as an art display or item.

#### 4-H:

1. Three age division champions and reserve champions will be selected. **NOTE:** Individual Class Champion and Reserve Champion ribbons will be awarded where number of entries and quality of entries warrant it.
2. Original Art must be exhibited.
  - 4-H member may create their own pattern or art project that contains paint, diamond art beads, string art or any other medium, then it becomes their own work
  - Combining parts of different patterns with a member's own

ideas can result in an original design.

- Changing the color, pattern, or size does not make the design original.
  - If a photo, sketch, or other idea source was used, or a new pattern was created by the 4-H member, please submit it with the exhibit.
  - 4-H member should describe the design process for the original art to the judge.
3. The judge will select up to five entries to compete at the Kansas State Fair. These will include one from each of the five classes. First and second alternates will also be selected in the event that one of the original five State Fair exhibitors chooses not to exhibit their art at the State Fair. Only entries selected by the judges are eligible for the Kansas State Fair.
  4. **No kits will be allowed.** Any project that comes pre-packaged or boxed as a "kit" is not an allowable project. Examples include: paint by number, diamond art kits, string art, etc. Exception: Leather project kits, due to the nature of pre-cut leather, are allowed.
  5. Two-Dimensional Art is described as a form of visual art that exists on a flat surface & has width and height, but no depth. Examples include: drawings, paintings, prints, art created with charcoal, ink, watercolor, pencil, paint, etc.
  6. Three-Dimensional Art is described as a form of art that has height, width, and depth and can be viewed from multiple angles. 3D art takes up physical space. Examples include: clay molding, glass blowing, sculpture, casting, modeling, carving, & construction.

1. Exhibitors may exhibit up to 2 entries in 4-H and 2 entries in Open Class.
2. Refer to Rules & Regs on pages 4-6.
3. The plan from which the exhibit was constructed must be with the article. The plan may be a photocopy, the actual pattern, or a scale drawing. It must be complete and accurate to the extent that a duplicate article could be built using the plan as a guide. Please note: a set of step by step instructions is not a plan.
4. Projects with missing or insufficient plans will be lowered one ribbon placing (i.e. a blue ribbon exhibit will receive a red ribbon).
5. The use of materials other than wood should be kept to a minimum.
6. Fractal Burning will not be allowed on any woodworking entries.

7. Projects that have unsecured glass, i.e., glass shelves, glass top of a coffee table, etc., should not be brought to the fair. Glass that is secured in the project, i.e., glass front of a gun case of cabinet, etc., is permissible since it cannot be easily removed.
8. Entry card, plans and all other paperwork should be secured to the project in some manner. Tape is usually not adequate to accomplish this. It is recommended to use a zip top plastic bag with a hole punched through it and using string to tie this to the exhibit.
9. Refinished/repaired furniture should be exhibited in the Home Environment project area.
10. Projects made from pre-cut kits are not allowed.

## Clover Brand Sponsorship

The 4-H Clover is a reminder of duty to club, community, country, and world. The new KanEquip Arena on the Wabaunsee County Fairgrounds highlights the Clover Brand as a sustaining way to support the Wabaunsee County Fair, facilities, and its successful partnership with the 4-H program.

Each Clover Brand Sponsorship (\$250 per year) includes:

- Business, individual or family name on a Clover Brand on the wall of the KanEquip Arena for one year (through February 1 of each year)
- Business-card-sized ad in the current Fair Book
- Recognition on a list of all Clover Brand sponsors in the current Fair Book

Clover Brand sponsors will be asked annually to renew their pledges on or before February 1. A perfect time to maximize your donation is to contribute to the Wabaunsee County Fair Association during the Alma Match Day in August, and the donation will be credited to the upcoming 4-H year. Private and business donations are welcomed. Contact a Wabaunsee County Fair Association Board member for more information on how to become a sponsor.
