Updates are in-progress to update the current building and there is continued effort at providing an additional facility. There is a need to accommodate current 4-H project judging & events that are held off-grounds during fair time due to lack of space & usable facilities at the fairgrounds.

Judging Sunday, July 28; 1:00 p.m.
Rocket Launch Monday, July 29; 5:30 p.m., WHS Football Field

1. Limit 1 entry per class, max. of 2 entries per division.
2. Refer to Rules & Regs on pages 4-6.
3. If two rockets are entered, one rocket must be a “kit” and the second may be entered into any other applicable class. An exhibitor may not enter two rockets in the same class. To exhibit in this division, the rocket must have been flown. Support rods must not extend past the tip of the highest nosecone on the model. Support rods must remain in the upright position, do not angle. No model may be submitted on a launch pad.
5. The report that accompanies the rocket must be limited to the 4-H Rocket Exhibit Information Form which is glued to a 10” x 13” envelope.
6. Plans (or a photocopy) must be placed inside the envelope. This includes original design rockets. If a rocket kit has been modified structurally, notations need to be given that indicate the changes made. One or more photographs of the rocket at the launch site are required. Photographs showing the rocket at the moment of ignition are preferred. Photography should be mounted on one side of an 8 ½” x 11” page.
7. For rocket entered in the original design classes, one extra page of photographs may be added to show unusual construction or other important features. Describe in the summary how the model was tested for stability prior to flying.
8. The altitude achieved by the model is to be determined using a method other than estimation. Examples of accepted methods include altimeter, computer software, range finders, etc.
9. Each rocket must be able to stand freely by itself or be supported by a solid base, not to exceed ¼ inches thick and 8 inches square.
10. Angles of fins must fall within a plus or minus 2 degree variation using an approved fin alignment guide (such as DGD 031989)
11. Exhibits must be uniformly painted, smoothly finished and have decals applied smoothly. Fins should be rounded or streamlined. Fins and body tubes are to be sealed to eliminate the appearance of body grooves and wood grain. Any seams on plastic parts are to be sanded smooth. The rocket is to be properly assembled. Fins and launch lugs are to be filleted to reduce drag and properly secure them to the model. The nose cone is to fit snugly but still allow for easy removal.
12. Models may not be judged based on their paint scheme, with the exception of rockets that fit the definition of a scale model. They may be judged based on the paint scheme. Under no circumstances is the weight given to the paint scheme to be sufficient enough, by itself, to move the model from one ribbon placing to another.
13. Flight damage is to be documented by the participant. The judging of flight damage is to be secondary to all other aspects of the model and only then may it even be considered.
14. Beginner kits with prefabricated fin assemblies and pre-finished rockets requiring no painting are not acceptable.
15. Engines and igniters are not permitted with the exhibit.
16. Original design rockets cannot be a modification of a pre-existing kit and must be of original design.
17. Multi-stage rockets can be flown using just the final stage and be considered fully flown.
